(54) Title: **DYNAMIC SUPINATED SPLINT**

(57) Abstract: A dynamic supinated splint for increasing supination of a subject is described having a splint body with a distal hand support section and a proximal forearm support section. The hand and forearm of a subject are strapped to the splint body using a plurality of straps. A supinated force is generated using a force generator anchored to the splint body through hooking arrangements and an outrigger in a diagonal arrangement for creating a torque or a moment.
